Search Preferences

?

Default Results

These are the main results Alfred presents by default, and where he looks for them.

Applications:

Applications are always included in Alfred's default results.

Essentials: Preferences Contacts

Extras: Folders Documents Text Files
 Images Archives AppleScripts

Note: Alfred works most efficiently if you only have 'Essential' items ticked and use the 'open' keyword to find files. You can also press [spacebar] immediately after activating Alfred to quickly enter the file search mode.

Unintelligent: Search all file types

WARNING: Selecting this will slow down and muddle the default search results considerably. Use 'open' and 'find' for file operations instead.

Search Scope: Include folders in Home - Excluding ~/Library

/Applications
/Applications/Xcode.app/Contents/Applications
/Developer/Applications
/Library/PreferencePanes
/opt/homebrew-cask/Caskroom
/System/Library/CoreServices/Applications
/System/Library/PreferencePanes
/usr/local/Cellar
~/Library/Caches/Metadata
~/Library/Mobile Documents
~/Library/PreferencePanes

These folders define where Alfred looks for files, applications and metadata. Fewer paths give more accurate results. Drop folders above from Finder or Alfred.

+ - Reset

Fallbacks:

Fallbacks are shown when Alfred is unable to find any results. If the option to intelligently show fallbacks is selected, Alfred will show the fallbacks when relevant. By default, Alfred shows Google, Amazon and Wikipedia.

Type Less, Say More

Use the Clipboard History / Create your own
snippets

Extend and Automate

Link hotkeys, keywords and actions together to
create your own workflows;

Why

- Vs spotlight
- We need Launcher.Just Searcher
- Workflow/Custom actions/
System commands

How

- Download Alfred app
- Reading preferences
- First Experience / Easy search
- Import external workflow

Download Alfred app

Free from <https://xclient.info/>

Reading preferences
